

MPS Featherweight Shift Lite Installation Instructions

The MPS Featherweight Shift Lite is a lightweight LED shift lite made from ABS plastic to save weight. Make sure you know what type of signal your rpm switch sends. This is very important. If it sends a power, you will connect it to the red wire and connect the black wire to ground. If it sends a ground, you will connect it to the black wire and connect the red wire to ignition switched 12vdc positive.

**Red Wire = Positive
Black Wire = Negative**

**Note: The LED is polarity sensitive and will not work if wired backwards!
The light will not function without an external RPM Switch!**

If you have any more questions we have a Frequently Asked Questions page at our web site as well as the telephone tech support. Thank you for your purchase of this MPS product. All products sold by MPS are for use at closed course competition events and not for use on public streets or highways.
