Gen 2 Electronic Engine Kill

Casselberry, Florida, 07/10/2019 – Motorcycle Performance Specialties is excited to announce the immediate availability of our Gen 2 Air Shifter Kill Box. The Gen 2 Air Shifter Kill box features adjustable kill time from 10 ms to 100 ms via dip switches inside the box. The air valve is now directly operated by the engine kill box. A fixed 25ms delay between the air valve activation and the engine kill ensures there is no wasted kill time. A direct ground lead to the cylinder head isolates the kill circuit from the rest of the electronics. They are smaller in size than previous version measuring only 4.0" x 2.8" x 1.2". The Gen 2 Electronic Engine Kill, P/N 1-0263-1 are priced at \$169.00 and are in stock now for immediate shipment.
