Battery Not Included!

MPS Battery Box for WPS Battery

MPS Featherweight Battery Box is made from lightweight ABS plastic and are custom made for the WPS Featherweight Batteries. The P/N 25-490-2516 (240 A) and P/N 25-490-2518 (360 A) are both batteries fit perfectly in the box. The MPS Featherweight Battery Box has 4 mounting holes on the bottom for 6mm countersunk screws.

The small screws on the side hold the battery in the box. The top holes are for the 360 Amp battery (P/N 25-490-2518) and the lower hole is for the 240 Amp battery (P/N 25-490-2516). They should be run in until they are just short of the battery. Apply a small amount of silicone to prevent it from backing out. There are slots at each end of the box to accept a (as shown) zip tie.

If you have any more questions we have a Frequently Asked Questions page at our web site as well as the telephone tech support. Thank you for your purchase of this MPS product. All products sold by MPS are for use at closed course competition events and not for use on public streets or highways.
